What is Intervention?

Have you ever heard or seen the word intervention in school and asked yourself, "I wonder what that is?" Intervention is providing the instruction and services that students need in order to be successful. This means we work with teachers and all students to help them reach their maximum potential. Some intervention is done outside of the classroom while some is done inside the classroom through a co-teaching model where there are two teachers work together to develop and nurture the needs of the students. You may also wonder, "who receives intervention?" All students interact with an intervention specialist and/or tutor throughout their day. We as a team analyze and discuss data to ensure all students are getting what they need in and out of the classroom.

Our team is excited to be working with the students and staff of Hylen Souders Elementary school this year. We are looking forward to many celebrations of growth while students achieve their own personal goals. Thank you for giving us the opportunity to be a part of your student's lives.
