COVID-19 Update to Families (Technology Text Blast) - March 22, 2020

Good Evening Big Walnut Families,

Due to the Governor's "stay-at-home order" being announced today, our district technology department will be working from home beginning this Tuesday until at least April 6. The technology department will still be able to offer chromebooks to families without a device at home for one more day tomorrow, Monday, March 23 as the order goes into effect tomorrow evening. If you need a chromebook, please email bwit-support@bwls.net, as that will be the quickest way to reach our technology staff. We ask that you send your request as soon as possible and no later than by noon tomorrow. If you do not have access to email, you can leave a message by calling 740-965-3010. If you experience any problems with your district-provided device in the coming weeks, please email the technology department. While they will be unable to repair chromebooks during the stay-at-home period, they will do their best to troubleshoot issues. We hope that you are safe at home with your families and that you remain safe in the coming weeks.
